TANA 3D WALLBOARD DESCRIPTION

Pre-stained Teak Rootwood Interlocking 3D Wallboard.

These panels are made from the root of the teak trees and are FSC-certified. Pre-stained, ready for installation. The teak tree roots hardly ever see the light of day, even after the tree is harvested as they are left to rot underground. These panels rescue this part of the tree and repurpose it into these beautiful wall panels.

OPTIONS & UPGRADES

- Non-Customizable
