**LOIRE WALLBOARD DESCRIPTION**

Engineered Sinker Cypress Wall Paneling.

Beautiful mix of tans, reds and olive green hues. This lumber is harvested from logs that sunk in the river en route to sawmills and have spent decades underwater. Overtime the minerals in the river create a spectacular range of colors in the material.

**OPTIONS & UPGRADES**

- Edge Milling Options—Available upon request
- Penny Gap Options—Available upon request
- V-Groove Options—Available upon request
